

INSTRUCTIONS

Cleaning and degreasing solution for kitchen floors

Solu-Net is easy to use. A simple dilution is required.

Greasy kitchen floors: add 150 ml of **Solu-Net** to 15 liters of warm water in a clean bucket, spread the solution on floors using a clean mop, wash and wipe excess liquid, no need to rinse after washing the floors.

Other floors: Add 100 ml of **Solu-Net** to 15 liters of warm water in a clean bucket, spread the solution on the floor with a clean mop, wash and wipe excess liquid, no need to rinse after washing the floors.

For best results: scrub floors and ceramic joints using a soft bristle brush for the first wash with a diluted solution of **Solu-Net**.

Solu-Net can be used with an automatic dilution device.

Available formats: 4 and 20 liters.
