

INSTRUCTIONS

Cleaning and degreasing solution for commercial kitchen hoods

Solu-Vent is easy to use. No mixing is required. **Solu-Vent** is designed to degrease grease extractor's baffles of commercial kitchens hoods

Self-cleaning hoods: consult the manual and the manufacturer's instructions. For most makes and models of self-cleaning hoods, just replace the container of detergent inside the control pannel, by a container of **Solu-Vent**.

Filters hoods: Add 100 ml of **Solu-Vent** to 900 ml of water, on a daily basis spray the diluted solution directly on each filter and the inner walls of the hood at the end of cooking operations.

Solu-Vent can be used with an automatic dilution device.

Available formats: 1, 8, and 20 liters.
