

Solu-Vent

Solu-Vent is a biotechnological and readily biodegradable product containing bacteria and surfactants. These microorganisms digest the oils and fats, which accumulate in the filters and grease extractor's baffles from hoods and self-cleaning hoods.

Solu-Vent is used and recommended to biodegrade oils and greases built-up in commercial kitchen hoods for restaurants, hospitals, hotels as well as for the agribusiness industry.

Solu-Vent is **EcoLogo certified**, respects the environment and advantageously replaces traditional chemicals. It also eliminates odors.

Solu-Vent is easy to use. No mixing required. Simply spray daily on each filter or inject it with the automated system of the self-cleaning hood.

For best results, make sure the filters or grease extractor's baffles from hoods and self-cleaning hoods. are clean before the first application of **Solu-Vent**.

Characteristics :

Form:	liquid
Colour:	green
Fragrance:	apple
Content:	bacteria and surfactants

Solu-Vent is safe and user-friendly. It contains no caustic or corrosive products. It will not damage the ceramics, metals and plastics. **Solu-Vent** is **EcoLogo certified** and **Tested in Laboratory**.

BENEFITS

- Accelerates biodegradation of oils and fat accumulated in filters and greases extractor's
- Replaces advantageously harsh chemicals
- Leaves a protective film in the piping
- Safe for the user and for metals and plastics
- Applies automatically
- EcoLogo certified
